January 23, 2000

Dear Dr Henney -

I am greatly concerned about the fact that our country allows the use of antibiotics to promote growth in livestock when these same antibiotics are used to control infections in human beings. The prospect of medication resistant diseases is frightening enough on it's own without exacerbating the problem by foolhearty use of antibiotics for livestock.

Please do what you can to bring about a ban on the animal uses of growth-promoting antibiotics that are also used in human medicine.

Sincerely,

Mary Hicks Ph.D
