Dear Commissioner Henney,

I would like to let you in on a little secret. The chemical, rBGH, used to make cows produce milk is bad. It is bad for the cows, and in turn is bad for humans as well. Cows are my friends, and if you drink milk, they are your friends, too. Please help control the use of rBGH by mandating labeling of rBGH on a national scale.

Thank you for your time + concern,
Matt Lynn
