July 7, 1999

Dear FDA,

Thank you for the job you do for us. Your work to help the public with safety and give information on products is wonderful.

I have one concern at this time. MOU – compounding Section 503A of the Modernization Act. restricts the rights of the physicians and patients to obtain healthcare products from the provider of their choice.

Also restricts compounding pharmacists. Please don't restrict these rights. Many people can use the "One pill fits all" synthetics medication. I can't.

C 6155

I have allergies and reactions to most those types of medication. NOT all but a large, large number of them. This causes a problem for me and many other allergy people. Compounded medicines work for me and a lot of allergy people. We are all not made the same. So different ones need different medicines. Why should non allergy people get what works for them and we allergy people are denied?

It would be costly for the drug co. to invent a natural product for people like us. They do help the large majority of people. Bless their hearts. But we need what works for us. I don't see any problem in having a little change. Especially to help our small allergy group. Please amend the MOU. I for one would greatly appreciate it. Thank you for your time
