(HFA-305)
5630 Fishers Lane, Room 1061
Rockville, MD 20852

Dear Madam,

We are in full support of the Citizen Petition (Docket # 00P-1211/CP1). We don't want any genetically engineered foods, and we are concerned that we may have them forced upon us. Our main fear is that G.E. foods may prove unsafe to humans. Another deep concern is the probability the G.E. foods may create toxins and resistance to antibodies.

Our environment is in a precarious state now. How will the genetic engineering of seeds,

C 6297

00P-1211

etc. affect it?

We'd like verymuch to have mandatory testing (with suitable time elapsed) before genetically engineered foods are put on the market; a moratorium on ALL G.E. foods until these requirements are met; honest, strict labeling that plainly tells when the contents are genetically engineered.

We have a right to choose what we put into our bodies.

We eat organic foods when we can and are very concerned about the probability of organics being endangered, polluted by genetic engineering.

Please pay attention to these real concerns. Thank you,

Mr. & Mrs. Virgis Franks
