Dear Sirs: April 2000

This letter refers to docket
2693 00 APR 20 AM 10:58
#99 P-4613, a petition to
ban the use of genetically
engineered Bovine Growth
Hormone on dairy cows.

BGH is both unhealthy
& inhumane to cows &
humans. BGH increases
milk production, causing cows
udders to become so heavy
& swollen they drag on the
ground & can be stepped on.

Some large supermarket
companies in the US have
asked their suppliers not
to ship them milk from
cows given the drug. BGH
causes lameness in cows also.

Please ban BGH.

Thank you,

Marilyn Evenson
