Dear Dr. Henney:

Please ban the use of antibiotics to promote livestock growth when those drugs are also used to treat humans! As you know, the Centers for Disease Control and Prevention and important public health organizations are concerned about the massive use of antibiotics to increase livestock weight because of antibiotic-resistant bacteria.

Please ban human-use antibiotics from being added to animal feed. People will suffer if their illnesses cannot be treated with antibiotics. To be developing antibiotic-resistant bacteria is a major blow to human health.

Sincerely,
M. Ruth Niswander
