11-24-1999

Respectfully Jane E Henney,

As the federal Department of Agriculture

2758 '00 JAN -6 P12:01

Commissioner, I urge you to stop the routine use of antibiotics in animal feed. This allows the bacterium to become resistant to medicines. Medicines that are used to treat human illness due to bacterium. Then when a person becomes ill, there are not medicines to cure the illness. The best defense is good health, however many people have weakened immune systems Please consider banning the use of anti-biotic in animal feed.

Sincerely
Ms Karen Larsen
