12/14/99

To Jane Henney, M.D.

Please use your authority to stop genetically engineered products being released to the public. Much more testing is needed.

99 DEC -6 A11:32

Breeding antibiotics into seeds causes virus + bacteria to mutate and become immune to antibiotics.

People taking too many antibiotics has already caused virus + bacteria to become immune to antibiotics.

Pass legislation to hold makers of gene altered products liable for harm done to the planet + people.

Thank You,

Dorothy Matz
