TO: Jane Henney
FDA Commissioner

Dear Mis. Henney,

I am taking this time to write to urge your attention to an important matter.

For a number of years anti-biotics have been used to promote growth in animals. I've always considered this to be alarming. It has recently come to my attention that the CDC in Atlanta has judged a European ban on anti-biotic use to be valid. Let's not study this to death! Please initiate an immediate ban. I look forward to hearing from you.

Sincerely
Robert W. Lincoln
