Dear Dr Henney

I am writing about animal use of growth-promoting antibiotics used in medicine for humans.

You know the problems as well — or better — than I do — i antibiotic resistances, Campylobacter in poultry, thousand getting sick millions at risk.

~~They~~ This is that golden opportunity for the FDA to show that is not a spineless agency; put your foot down, face greedy Congress and agricultural interests and outlaw now these harmful practices. The Europeans already did it. Let's show we still are a working democracy! C2338

99P 0485

Thanks you!

Sincerely
J Barb
