1/7/2000

Dear Dr. Henney:

This letter is to encourage you to do anything in your power to stop the use of antibiotics for growth promotion in animals on farms.

My daughter had campolobacter jejuni last year from tainted chicken she ate in a Denver restaurant. I read this morning where a woman in Illinois has died from Staph A, because Vancomycin didn't work due to the increasing resistance of the bacteria.

I was very active politically in the 70's + got sick of "beating my head against a brick wall" Please listen - Thanks -
