Dear Congressman Burton,

3618 '99 SEP 17 P12:23

It appears that the FDA is ignoring your specific request re: paragraph 2 of the U.S. codex comments concerning vitamins & minerals. It seems their intent is to have vitamins issued by prescription only.

I urge you to call John Hammell & Bonnie Camo, M.D. to a hearing before your committee & I urge you to force the FDA to withdraw the second paragraph of its comments along with the NAS Risk Assessment document.

The public can & should decide for themselves what they will ingest as Congress recognized with the passage of DSHEA.

Thank you,

Mark Putnam
