Honorable
Acting Comm. Friedman M.D.

3631 '00 JAN -7 P1:47

When the FDA approved Monsantos rBGH you did so on incorrect facts engineered by Monsantos who hid the health impacts of this drug. When first put on the market by consumers wrote & told your country that adequate safety tests were not performed. Also we wanted milk from rBGH injected into cows to be labeled. Neither of these requests were answered so those of us who were aware bought Organic milk. This started in 1993. Now in Nov 1998 a new study by your Canadian counterpart "Health Canada" has confirmed all our fears. Please stop Monsanto from selling their product harming especially infants & young children's hormones

adults too of course
but its the
new generation growing
up who are to lead us
in the future who will be the
most harmed. Your ~~complicity~~ COMPLIANCE
~~and~~ with Monsanto is causing
untold suffering & harm. With-
draw from partnership with such
a money grubbing business whose
head people are only interested in the
$.

Sincerely
Louise Carguiolo
