To Donna Shalala:

I'm very upset that the food industry wants to irradiate food (30% of America food). The food industry says irradiating food is safe, yet they don't want American consumers to know that the food is irradiated. They refuse to label irradiated food. If irradiated food is safe, how come they don't want to label it? At least give people a choice. irradiated food should be labeled. Then if people want to be it, but I won't buy that food, I don't want to be a guinea pig. Stop irradiation of food, by the food industry.

Yours truly,
[illegible]
