Docket No. 00P-1211/CP1
Rockville MD 20852

Dear Ms. Henney:

I am writing to express my concern about the marketing of genetically engineered (GE) foods.

There needs to be a thorough pre-market and environmental testing regime for GE foods. All GE foods should be required to have a label identifying them. How can something be given a patent yet not be considered significantly different from non-GE foods and not subject to testing and labelling?

Thank you for your attention to this matter.

Sincerely,
Carol Cox
