Dear Madam,
This is to request that you do all you are capable of to see that any genetically engineered foods offered for sale to the consumer has undergone stringent premarket safety and environmental testing and in the event that such foods reach the market that they're labeled without fail. Re: Docket # 00P-1211/CP1 & Docket #99N-4282. It is crucial that we have a safe food supply and that we have a choice whether we consume such fare as represented by the GE foods. Thank you,

J.H. Jackson
