Re: olestra (Olean) from P&G

Dear Dr Henney,

Please continue to require obvious labeling warning the public/consumer that Olean/olestra may cause abdominal cramping and loose stools. The best case you could make for doing so is to ask Proctor + Gamble + Frito Lay to provide you with cases of chips containing about 3-400 mid-sized bags of potato chips with Olean; and for them to provide each member of Congress with a mid sized bag of chips w/Olean (for your staff)

There will be enough adverse reaction among your FDA staff + the US Congress so as to end this debate + start one on pulling the product off the market entirely. CHI

ODF-0792

I suffered a miserable night-long bout of cramps + loose stools; not since being over

years have I experienced such digestive tract distress!

Thank you,
