Dear Mr. Levitt; 6/8/00

I am writing to you regarding my concern about the lack of regulatory laws that would require bottled-water manufacturers to disclose where their water comes from, as well as exactly what has been filtered out.

I support the FDA's proposal that bottled-water manufacturers be required to make available detailed reports of contaminants that have been removed from their water, and by what method.

Thank you for your attention to this matter, and lending an ear.

Sincerely,

Mrs. Jill Adams
