FDA,

I understand audiologists want to take away my right to try a hearing aid by mail order. At present I can try a hearing aid by mail and if the darn thing doesn't help, can send it back. "What a concept"

There is no way that trying a hearing aid is hazardous to my health! It is only hazardous to the audiologists 300% profit.

I don't need a audiologist and don't need the FDA to tell me I need to see one.

I suggest the FDA stick to prescription drug regulation.

I don't need you to select a hearing aid!

Sincerely

Tony Alexander
