MF 3577

MEMORANDUM OF TELEPHONE CONVERSATION
November 6, 1975

Between: Dr. Joseph McKenna, Diamond-Shamrock Chemical Company

and

Dr. Gerald B. Guest, HFV-5

Subject: Bacitracin Marketed by Diamond-Shamrock (D/S)

The question had arisen in the Bureau of Veterinary Medicine and the Office of General Counsel as to whether or not bacitracin products were marketed by Diamond Shamrock (D/S) prior to August 1, 1958. This question is important since products on the market prior to that time are covered under the "transitionally approved" provisions of the Act.

Dr. McKenna, at my request, checked Company records on the marketing of bacitracin M.D. and zinc bacitracin. Dr. McKenna telephoned me back on the same day to report that both feed-grade and water soluble bacitracin M.D. and zinc bacitracin were marketed by D/S, in his words, "well before August 1, 1958."

Gerald B. Guest, D.V.M.
