A note from...
Brenda Frey

Dear Food and Drug
Administration:
To protect humans
I hope you will
prohibit the use of blood,
poultry litter, plate waste
and all other animal
products in feed for
farm animals. The
practice of allowing
downed animals to be
on our plate should of
never started either.
If an animal is
too sick to
stand why should
it go on our
plates. I hope

A Proud Supporter of the American Humane Association
Protecting Children and Animals Since 1877
