Food & Drug Administration  
Dept. O-T-C Monographs  
Rockville, MD

Dear Sir:

This letter is to petition the O-T-C Board for nasal sprays that our proposed new product OCEAN-PLUS be considered for approval.

OCEAN-PLUS is a nasal decongestant containing caffeine 5% in an isotonic saline base.

OCEAN-PLUS constricts nasal capillaries, is not a sympathomimetic unlike all other decongestants, is not addictive, does not cause the 'rebound syndrome' and does not damage capillaries, turbinates and cilia. These other side effects have turned many physicians away from 'nose drops' and they look forward to the ability to recommend OCEAN-PLUS for their patients' use.

If further information is needed please advise us.

TEF:ss

Sincerely

*Tom E. Fleming*
