Washington, DC 20204

Dear Sir or Madam:

This notification is provided pursuant to 21 C.F.R. 101.93.

Dr. Hauschka Cosmetics USA, Inc., first began the marketing on January 2, 1998, of a dietary supplement containing the following statement:

1. An active population of intestinal flora regulates digestive activity and is a prerequisite for a balanced metabolism that supports healthy functioning of the skin. Inner Cosmetic contains lactic acid fermented wheat, rye and oats for the support of healthy digestion and the preservation of intestinal flora, which are integral to supporting a clear complexion and healthy skin. Mineral clay and plant extracts of birch leaves and nasturtium complete the composition of this valuable nutritional supplement which acts as an internal cleanser for all skin types.
2. Inner Cosmetic—A Natural Dietary Supplement

I certify that to the best of my knowledge and belief, the information in this notice is complete and accurate, the statement is truthful and not misleading, and Dr. Hauschka Cosmetics USA, Inc., has substantiation, which in its mind is sufficient to make the statement.

Sincerely,

Clifford Kurz  
Vice President and CEO
