Dear Dr. Yetley,

We respectfully submit the attached labeling for your review pursuant to Section 403 (r) (6) (C) of the Federal Food, Drug and Cosmetic Act. We are a Private Label Manufacturer for dietary supplements. Even though the primary responsibility for submission of the label is with the distributor, we are submitting the labels in case they have not already done so. Our customers are the responsible entity for the statements contained within the labeling.

Labeling included:

Label for Experimental and Applied Sciences (EAS) :

Label for EAS - NEUROGAIN - Neurotransmitter Support System

If you have any questions, I can be reached at (714) 288-8577.

Sincerely,

Ron Hoover
Manager, Quality Assurance

LET 1470

Recommended Use: As a dietary supplement, take 4 tablets twice a day. Be sure to take one serving one hour prior to training. Do not exceed 3 servings (12 tablets) per day.

NEUROGAIN With the introduction of NeuroGain, EAS establishes a new frontier in sports supplementation: synergistic neurotransmitter precursor loading.* By focusing on the mind-muscle connection—the forgotten element of athletic performance—EAS adds a new weapon to the arsenal of drug-free athletes who are looking to get better results faster from their workouts. NeuroGain was designed to help hard-training athletes:

- Crank Up Workout Intensity
- Boost Overtraining Syndrome
- Increase Performance
- Enhance Feelings of Well-Being
- Zap Burnout
- Boost Focus and Drive

The NeuroGain formula contains a precise blend of nutrients which support the formation and function of "excitatory neurotransmitters," including: dopamine, norepinephrine, epinephrine, and acetylcholine. A depletion of these neurotransmitter levels may be linked to symptoms often associated with overtraining and poor athletic performance, including fatigue, achiness, loss of motivation and drive (lack of strength), and an inability to focus.

To support optimal neurotransmitter formation, NeuroGain contains an ample dose of the amino acid tyrosine, a precursor to dopamine, norepinephrine, and epinephrine, which play a critical role in muscular contraction, mental focus, and performance. Also included is a precise dose of DMAE, nature's purest and most bioavailable form of choline, which is a precursor to the neurotransmitter acetylcholine. This compound is integrally involved in muscular force, coordination, and balance. St. John's wort (standardized to 0.3% hypericin) is added to support the "active life" of vital neurotransmitters. And, rounding out the NeuroGain formula is a broad spectrum of essential vitamin and mineral cofactors which play a key role in supporting the formation of neurotransmitters.

NeuroGain—another scientifically designed, proprietary formula available only from Experimental and Applied Sciences—where science never stands still!™

Dietary Supplement

120 Tablets

Supplement Facts

Serving Size: 4 tablets	Amount Per Container: 80	% DV*
Vitamin C (as ascorbic acid)	100 mg	167%
Thiamin (as thiamin mononitrate)	0.8 mg	33%
Vitamin B ₆ (as pyridoxine hydrochloride)	2 mg	100%
Niacin (as nicotinic acid)	100 mcg	20%
Vitamin B ₁₂ (as cyanocobalamin)	2 mcg	33%
Phosphorus (as D-calcium phosphate)	4 mg	40%
Iron (as ferrous sulfate)	2 mg	17%
Zinc (as zinc gluconate)	2 mg	20%
Copper (as copper gluconate)	1 mg	50%
L-Tyrosine	3,000 mg	—
St. John's wort (standardized for 0.3% hypericin)	300 mg	—
DMAE (dimethylaminoethanol)	200 mg	—

*Percent Daily Values (% DV) are based on a diet of 2,000 calories per day.

NEUROGAIN INGREDIENTS: L-tyrosine, DMAE (dimethylaminoethanol) bitartrate, St. John's wort, ascorbic acid, zinc gluconate, ferrous sulfate, copper gluconate, calcium phosphate, pyridoxine hydrochloride, thiamin mononitrate, nicotinic acid, and cyanocobalamin.

WARNING: Keep out of reach of children. Accidental overdose of iron-containing products is a leading cause of fatal poisoning in children under six. In case of accidental overdose, call a doctor or poison control center immediately. Do not take this product if you are presently taking prescription medication, including, but not limited to, diet pills, antidepressants, MAO inhibitors, central-nervous-system-stimulating drugs, if you have any known medical conditions, or are pregnant or lactating. Hypertension (the active ingredient in St. John's wort) supplementation may cause increased photosensitivity in some individuals.
