Ref: 39-NYK-98

Dear Mr. Long:

During an August 7, 1998 inspection of your bus service area, our investigator observed violations of the Public Health Service Act and regulations for the Control of Communicable Diseases and Interstate Conveyance Sanitation (Title 21, Code of Federal Regulations, Parts 1240 and 1250).

At the conclusion of the inspection our investigator presented to John C. Passy, Manager, a list of Inspectional Observations, Form FDA-483 (copy attached) and discussed the findings with him. The following deviations were found:

- There is no backflow preventor device for the line leading to the hose used for flushing and washing the retention tank.
- There is no sign instructing employees to wash their hands before resuming work.

The above violations are not intended to be an all-inclusive list of deficiencies which may exist. As a result of this inspection, a "Provisional" classification has been assigned for a period of thirty (30) days at which time a reinspection will be conducted. If significant improvement has not been made at that time, a "Not Approved" classification will be justified.
