WARNING LETTER

CERTIFIED MAIL
RETURN RECEIPT REQUESTED

Mr. David Schuette, President
Regal Medical Services, Ltd.
3096 Forest Road, P.O. Box 1134
Bedford, Virginia 24523

Dear Mr. Schuette:

The Food and Drug Administration (FDA) conducted an inspection of your Warsaw, Virginia facility on September 29, 1998. During the inspection, deviations from the Current Good Manufacturing Practice Regulations (CGMP), (Title 21, Code of Federal Regulations (CFR), Parts 210 & 211), were observed. These deviations cause your Oxygen, USP to be adulterated within the meaning of Section 501(a)(2)(B) of the Federal Food, Drug and Cosmetic Act (the Act). The deviations included the following:

1. Failure to establish and maintain complete laboratory records for the calibration of instruments used in the manufacture and testing of Oxygen, USP. Certificates of analysis or other records were not available to show that the oxygen used as a calibration standard met specifications or was traceable to any known standard.
2. Failure to establish accurate and complete batch production records for each batch of Oxygen, USP, including documentation that each significant step in the manufacture, processing, packing, or holding of the batch was accomplished. For example, your firm failed to document the prefill external examination of cylinders, failed to document the venting of cylinders prior to filling, and failed to document labeling review and reconciliation including color coding of cylinders.
3. Failure to establish approved written labeling issuance and control procedures. For example, product labels were stored in an uncontrolled area accessible from the exterior parking lot, and there were no procedures for or records of label issuance or reconciliation.

Mr. David Schuette

4. Failure to establish and maintain procedures for product holding and distribution. Oxygen, USP cylinders were not quarantined by Quality Control prior to release.

The above listed violations are not intended to be an all-inclusive list of deficiencies at your facility. It is your responsibility to assure that your establishment is in compliance with all requirements of the federal regulations. Federal agencies are advised of the issuance of all Warning Letters concerning drugs and devices so that they may take this information into account when considering the award of contracts.

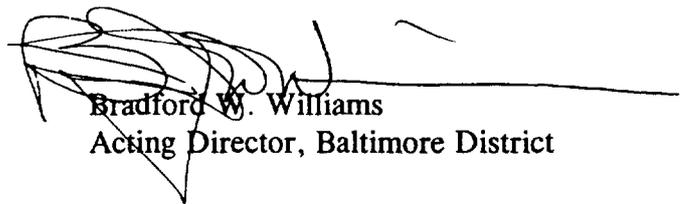

By copy of this letter, we are advising the Health Care Financing Administration (HCFA) that our inspection revealed significant deviations from the Act. They may elect to defer or discontinue payment for any health care product in violation of state or federal law.

You should take prompt action to correct these deviations. Failure to do so may result in regulatory action without further notice, such as seizure and/or injunction. Enclosed is a compressed medical gases guideline which discusses the applicability of the CGMP Regulations to medical gas manufacturers.

Please notify this office in writing, within 15 working days of receipt of this letter, of specific steps you have taken to correct the noted violations and to prevent their recurrence. If corrective action cannot be completed within 15 days, state the reason for the delay and the time within which the corrections will be completed.

Your reply should be sent to the Food and Drug Administration, Northern Virginia Resident Post, 101 West Broad Street, Suite 400, Falls Church, Virginia 22046, to the attention of Gerald W. Miller, Compliance Officer. Mr. Miller can be reached at (703) 235-8440, extension 504.

Sincerely,

Bradford W. Williams
Acting Director, Baltimore District
