WARNING LETTER

June 22, 2000

CERTIFIED MAIL
RETURN RECEIPT REQUESTED

REF: NYK-2000-78

Mayer J. Saad, M.D., PC
Woman's Health Pavilion
8212 151st Avenue
Howard Beach, NY 11414

Facility ID: 183350

Dear Dr. Saad:

Your facility was inspected on May 23, 2000 by a representative of the New York City Bureau of Radiological Health, acting in behalf of the Food and Drug Administration. This inspection revealed a serious regulatory problem involving the mammography at your facility. Under a United States Federal law, the Mammography Quality Standards Act of 1992, your facility must meet specific requirements for mammography. These requirements help protect the health of women by assuring that a facility can perform quality mammography. The inspection revealed the following Level 1 finding at your facility:

- (1) Processor QC records were missing 4 of 4 days of operation in the month of December, 1999.***
- (2) Processor QC records were missing 100% of the total number of days when mammography was conducted during the month of December, 1999 for the Kodak X-OMAT M35 or M35A-M.***
- (3) Phantom QC records were missing for 4 weeks in December, 1999 for the Bennett X-Ray Corp. unit in Room 1.***

The specific problem noted above appeared on your MQSA Facility Inspection Reports which was issued to your facility at the close of the inspection. This problem is identified as Level 1 because it identifies a failure to meet a significant MQSA requirement.

Because this condition may be symptomatic of serious underlying problems that could compromise the quality of mammography at your facilities, they represent violations of the law which may result in FDA taking regulatory action without further notice to you. These actions include, but are not limited to, placing your facility under a Directed Plan of Correction, charging

Warning Letter NYK-2000-78

your facility for the cost of on-site monitoring, assessing civil money penalties up to \$10,000 for each failure to substantially comply with, or each day of failure to substantially comply with, MQSA standards, suspension or revocation of your facility's FDA certificate, or obtaining a court injunction against further mammography.

There were also Level 2 findings that were listed on the inspection report provided at the close of the inspection. The Level 2 findings were:

- (1) There is no written procedure for handling consumer complaints.*
- (2) There is no written procedure for infection control.*
- (3) Processor QC records were missing on 4 consecutive days for the Kodak X-OMAT M35 or M35A-M.*
- (4) Seven of ten random mammography reports reviewed did not contain an assessment category.*

It is necessary for you to act on these matters immediately. Please explain to this office in writing within fifteen (15) working days from the date you received this letter:

- the specific steps you have taken to correct the violation noted in this letter;
- each step your facility is taking to prevent the recurrence of similar violations; and
- sample records that demonstrate proper record keeping procedures.

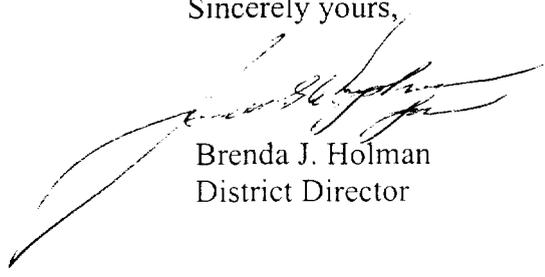

Please submit your response to the above issues to the attention of Lillian C. Aveta, Compliance Officer, U.S. Food and Drug Administration, 158-15 Liberty Avenue, Jamaica, NY 11433.

Finally, you should understand there are many FDA requirements pertaining to mammography. This letter pertains only to findings of our inspection and does not necessarily address other obligations you have under the law. You may obtain general information about all of FDA's
