Text of side Panel: Phosphatidylserine (PS) is a natural substance found in the brain which helps increase cell flexibility. This special ability improves function of neurotransmitters, in turn enhancing mental recall, focus and clarity. Many scientific studies have documented the health promoting properties of phosphatidylserine relating to cognitive function. Natural Factors PS is derived from soy, making it a completely natural substance. PS is a superb daily addition to the diet of anyone seeking safe nutritional support for memory or lack of concentration.*
