

**Memorandum**

Date September 3, 2003
From Jillonne Kevala
To Administrative File for Monounsaturated fatty acids from Olive Oil and CHD
Subject Memorandum of Telephone Conversation: (301) 436-2373

On September 3, 2003, I spoke with Dr. Guy Johnson. The call consisted of the following questions and answers:

- 1) Would Dr. Johnson like the olive oil and CHD health claim petition to be considered under the unqualified health claim or qualified health claim tracking system?
Dr. Johnson responded that he wanted the petition to be considered under the unqualified (SSA) system, and that he would inform me of this position via email.
- 2) Was Dr. Johnson aware that several articles of studies cited in the table given in Appendix B were missing from Appendix G nor were the articles listed in the Bibliography?
Dr. Johnson was not aware of the missing articles, however, he did say he would make sure FDA received a copy of all articles relied upon for support of the petition.
- 3) Could Dr. Johnson send FDA an electronic copy of the health claim petition including at least Appendix A and B?
Dr. Johnson responded that he would either try to email an electronic version of the petition to jkevala@cfsan.fda.gov, or else he would burn a CD containing the petition and mail it to FDA.

Dr. Johnson indicated that he would address the above issues after returning from his business trip on Friday September 5, 2003.

Jillonne Kevala Ph.D.
