CONCERNED CITIZENS FOR RELIGIOUS FREEDOM WORLDWIDE

P.O. BOX 111342
CARROLLTON, TX 75011-1342

Mr. Mark McClellan
Commissioner
FDA
5600 Fishers Ln
Rockville, MD 29857-0001

2/29/04

Dear Commissioner McClellan,

Our members are shocked and outraged that some think the FDA should sanction over the counter sales of the so called morning after pill with its potential for harm to young lives. We support your 90 day moratorium, and would hope for an indefinite moratorium.

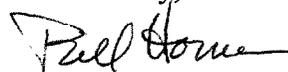

How sick is it to want to sell drugs to youngsters that could do them harm and not require a normal approval process, and especially in this easy to get fashion? Only long term testing like every other drug that comes through the FDA would confirm its obvious potential for harm. We strongly urge the FDA to pull this pill and the RU-486 pill off the market until such time that thorough and long term testing can be just like would be done for any other drug. This is not a drug for life safety, but a convenient, recreational drug for those who want to live promiscuous, immoral lives, and as such, the testing for this should be all the more stringent, not less. The long term cost for this in our society is staggering to consider. We know these drugs have been fatal to many teen women around the world already, and that, to any normal human being would be a reason, in and of itself, to pull these drugs for further testing. Surely the heartache and heartbreak of families already devastated should be reason enough.

What an abomination!! What are we thinking? Where is our common sense? Have we, as a nation, collectively gone insane?

Our members would like to hear from you on what the FDA will do in this regard. We are considering, as a group, asking our Congressmen for a federal investigation into this whole situation, but want to get your thoughts first. We are looking forward to hearing from you.

01P 0075

Sincerely,

Bill Horner
C.C.F.R.F.W.
