Section 403(r)(6) Notification

Dear Sir or Madam:

In accordance with the requirement of section 403(r)(6) of the Federal Food, Drug and Cosmetic Act, Leiner Health Products notifies the FDA that it has begun using the following phrase and statement:

Heat and Bone Health + Female Support

Soy isoflavones are natural constituents of soy foods. Some scientists believe that they are the main contributors to the heart health benefits of soy protein. Additionally, preliminary studies suggest that soy isoflavones may help maintain optimal hormonal balance during the transition into menopause and may inhibit certain enzymes that are responsible for bone loss.

Soy and its positive health benefits are gaining popularity in the Western world. Diets rich in soy have been known to support one's health: Heart./Bone/Female Support./Antioxidant Protection.

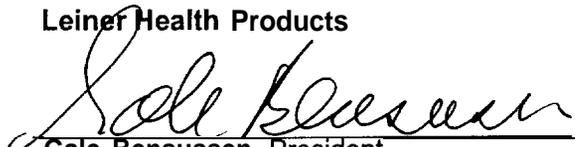

Women can benefit from isoflavones, as they are natural sources of phytoestrogens. Studies suggest that soy isoflavones may help maintain optimal hormonal balance during the transition into menopause. Additionally, soy isoflavones provide antioxidant protection against the harmful effects of free radicals.

on the following product:

YourLife® Soy Isoflavones

Very truly yours,

Leiner Health Products

Gale Bensussen, President
