

**FINDING OF NO SIGNIFICANT IMPACT
FOR**

Food Additive Petition 9A4155, submitted by Gattefosse S.A. to amend the food additive regulations to permit the safe use of glycerides and polyglycides of fatty acids of vegetable origin as excipients in vitamin tablets, pills, and liquid formulations.

The Environmental Review Team has determined that the approval of this petition will not significantly affect the quality of the human environment and therefore will not require the preparation of an environmental impact statement. This finding is based on information submitted by the petitioner in an environmental assessment prepared using the format described in previous 21 *CFR* 25.31a(a), on supplemental information from the petitioner dated October 17, 2000, updating certain sections of the environmental assessment, and on the attached supplement to the environmental assessment that we prepared
