

## ERRATUM

In the Pharmacology Toxicology Section of the Advisory Committee Briefing Document for NDA 21,318 (Forteo™), the 2<sup>nd</sup> paragraph on page 5 reads:

*“The incidence and degree of tunneling (intratrabecular remodeling) was dose-dependently and reversibly increased in vertebrae and iliac crest by LY333334. The incidence of woven in iliac crest biopsies bone was also increased at 15 months.”*

The last sentence in this paragraph should be deleted and the paragraph should read:

*“The incidence and degree of tunneling (intratrabecular remodeling) was dose-dependently and reversibly increased in vertebrae and iliac crest by LY333334.”*
