## Nonprescription Drugs Advisory Committee Meeting September 19 & 20, 2002

### Hilton - Maryland Ballroom - Silver Spring, MD

**September 19, 2002** - the committee will discuss safety issues related to the use of acetaminophen. The primary area for discussion will focus on potential hepatotoxicity related to the use of acetaminophen in both OTC and prescription (RX) products.

**September 20, 2002** - the committee will discuss safety issues related to the use of aspirin and other over-the-counter non-steroidal anti-inflammatory drugs (NSAIDS). The primary areas for discussion will focus on potential gastrointestinal bleeding and renal insufficiency related to the use of these products.

In rulemaking, the agency has proposed aspirin and acetaminophen as Category 1 ingredients for safety and effectiveness. Other NSAIDS and combination products are marketed under new drug applications. The agency continues to believe that these ingredients are safe and effective for OTC use. The advisory committee will discuss whether labeling or other measures are warranted to reduce the risk if occurrence or the severity of these adverse reactions.

## **SECTION I: OVERVIEW and FEDERAL REGISTER DOCUMENTS**

A	<b>Overview of the September 19 and 20, 2002 NDAC Meeting</b>
B	<b>Establishment of a Monograph for OTC Internal Analgesic, Antipyretic and Antirheumatic Products (Panel Report or ANPR)</b> <i>[Entire Federal Register Notice Is Not Included]</i>
