RE: Methyphenidate patch for children with "ADHD"

Dear Mrs. Reece,

I'm writing you to express my very strong opposition to the idea of drugging children with a patch soaked with methylphenidate! According to recent and growing medical evidence, such drugs can and *have* caused unconscionable harm to the health and welfare of children.

A hearing is supposed to be taking place on this very soon. This message is being submitted to you under the agreement established between you and Sheila Matthews of Ablechild.

Thank you for your attention to this very vital matter concerning our children.

Sincerely,

James Rego
Sylmar, CA
