

Dear Dr. Henney,

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food. I request that the agency's current policies be changed, and I support all the points in docket #00P-1211-CF1

- All GE foods should be labeled so I am informed and have a choice.
- GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing to determine the long-term impacts to human health and the environment.

(Additional Personal Comments:)

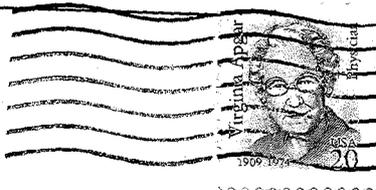

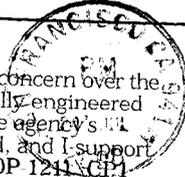

*Moratorium on GE foods as it is a matter of life or death for me. The organic sector is being contaminated by the genetic drift. Commercial*

food causes me cancer, mental illness & PMS. This contamination on the organic sector by the commercial sector will make me sick & kill me. I'm a breast cancer survivor & my doctors have already told me that if the cancer comes back, they can not help me. You the FDA already know pesticides cause cancer. Why do you let the USDA continue to pollute the commercial sector with pesticides, chemical fertilizers, grow food on top of industrial waste, irradiate food, use

### Consumer Response to FDA Docket #00P-1211/CP1

chemicals & hormones on our animals, raise animals thru factory farming techniques, etc. ?

I'm also requesting commercial sector be turned into organic farming according to the NOSB & not the USDA in order to prevent disease & suffering on humans & animals alike.
