FDA
Attention Ms. Jane Henney, MD.

Please table any regulations you have concerning consumers that wish to buy hearing aids by mail.

I have been to more than one audiologist and the results were less than helpful.

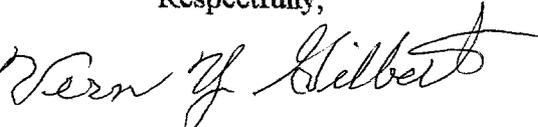

Twenty years ago I was told I had tendonitis and that a hearing aid would be of little value for me. Fifteen years ago I ordered hearing aids and supplies from EXCEL Hearing Solutions via the postal service and am well pleased with the results.

Many seniors cannot afford the cost of seeing a audiologist but do get good results from the ones we order via the postal service. This is a difficult situation for handicpped and disabled people.

I am handicapped and really appreciate being able to order my hearing aid supplies. Please give us some consideration.

I am much more satisfied with EXCEL Hearing Soliutions than the experiences I have had with an audiologist!

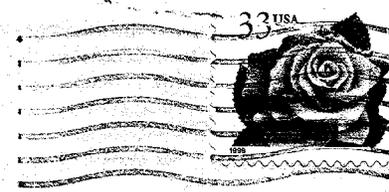

Respectfully,

Vern Y. Gilbert
