Rockville, Md. 20852

Dear Dr. Fisher:

I realize that the overuse of antibiotics in livestock is a difficult operation to alter. As a concerned citizen I want you to know that you have my support, and a great number of concerned consumers all over our country, in attacking this problem.

The health of the American people is endangered by the overuse of antibiotics in livestock. I want to compliment the FDA on its support of radiation of food.

Sincerely,

Mort Cohen
