

Dear FDA,

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food. I ask that the agency's current policies be changed, and to support all the points in docket # OOP-1211/CPI, specifically:

- All GE foods should be labeled so I can be informed and have a choice.
- GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing.
- There should be a moratorium on GE foods and crops until long term studies show they are safe for human health and the environment.

Additional Personal Comments: PROHIBIT PATENTING OF GE OR GMO ORGANISMS etc.
Thank you for your efforts to protect/ensure the safety/integrity of our food sources. Can't get more of these cards??
