Commissioner Jane Henney:

We are writing because of our grave concerns about genetically engineered foods (docket # ooP-1211/CPI).

We want...

- \*all GE foods labeled.
- \*moratorium of selling all or new GE foods.
- \*mandatory pre-market safety testing.

We feel GE foods are a threat to our health and environment. GE crops can contaminate other crops and have already caused problems with cross pollination and death of insects. Ideally, we want NO GE food being sold. There hasn't been enough long-term research to prove it's safety.
