Dear FDA,

I am writing to express my concern over the FDA's regulation of genetically engineered food, to ask that the agency's current policies be changed, and to support all the points in docket #00P-1211/CPI, specifically: All GE foods should be labeled so I am *informed* and have a choice, GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing and finally there should be a moratorium on GE foods and crops until long term studies show they are safe for human health and the environment.

Thank you for your energy in seeing that the comments of the citizens of the United States are heard and recognized. Please write to me with information on actions taken in regard to this request. Again, thank you,

Jared E. McEntyre
