Dear President Clinton,

I am writing to ask you to support legislation that will require clear labeling of all genetically engineered foods (Docket No. 00P-1211/CP1). It is the right of consumers to be fully informed about the products they are purchasing.

I also ask you to do everything you can to stop the production of genetically engineered food. It is too dangerous and unpredictable to alter foods.

Thank you for your consideration of my views.

Sincerely,

Diane Danielson

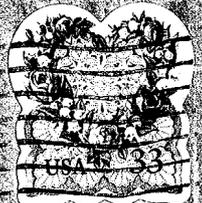

DDP-1211
