Postcard to the United States Food & Drug Administration

Jane E. Henney, Ph.D., Commissioner of Food and Drugs
United States Food and Drug Administration
FDA, HFI-40, Rockville, MD 20857

Dear Dr. Henney,

I strongly urge the United States Food and Drug Administration to immediately approve mifepristone (formerly known as RU-486). The FDA has already publicly confirmed the safety and efficacy data for this non-surgical abortion method.

The women of America should not have to wait any longer to have access to this medical breakthrough, as women in other countries, who are not intimidated by the pro-life contingent, have had access for years. Base your decisions on facts not politics.!
Sincerely,

Name: LINDA LARSON
