Ms. Jane Henney, Commissioner  
Food and Drug Administration (FDA) *webmail@oc.fda.gov*  
5630 Fishers Lane  
Room 1061 (HFA-305)  
Rockville, MD 20582

**TOPIC: The FDA's failure to require food manufacturers to label products that contain genetically-engineered (GE) material**

Dear Commissioner Henney:

The FDA's failure to require labels for GE products is unconscionable!

No one yet knows what the long-term effects of these products will be.

Despite this fact, the FDA is forcing young children to be unknowingly *medicated* with an unproven product without even informing their parents.

(Ironically, this the same FDA that will not allow terminally-ill AIDS patients to be given experimental drugs. The fact that most of these people will be dead before the years of experiments are completed seems to be irrelevant.)

I also find it ironic that, with so many options open to American consumers (four-wheel drive or two-wheel drive? Netscape or MSN? DVD or VCR?, etc.), parents are not given the very basic option of buying *GE or non-GE* food for their children!

They can, however, buy cola in sugar-free, caffeine-free, and regular forms!

I urge you: **Start requiring all foods that contain GE material to be clearly labeled!**

Respectfully,

Michael F. Moynihan
