~~My~~ HHS/FDA
Dear President Clinton,

I am writing to you about meat irradiation. I do not want it!!

What I do want is to eat wholesome food, as natural as possible. I want to enjoy eating without having to worry that I may be poisoning myself or my family. I deplore all the chemicals, etc. that are put into our food. And now this! The straw that breaks the camels' back?

The article I read in the March 1st Plain Dealer says that sufficient testing hasn't been done. Rats who ate irradiated food miscarried litters as they got older, while rats who did not eat the irradiated food did not miscarry.

We should not proceed with irradiation until further research is done.

Would you please do something to stop irradiation of our food?

Another thing I don't like is that it destroys some of the nutrients. Also it is not right that irradiated food does not even carry a label to warn those who wish not to buy it.

This is very disturbing! What kind of world are we leaving to our future generations?

Sincerely,
Eleanor Stasik
