Dear President Clinton,

Let's whoa up here! I am very concerned about the FDA's regulation of genetically engineered food. Please help change the current policies. I fully support all the points in docket #00P-1211/CP1.

- 1) All GE foods should be labeled
- 2) GE foods should not be assumed to be safe until they are tested, pre-market.
- 3) Implement a moratorium on all genetically engineered foods until long-term studies prove their safety both for human health and the environment.

This is a very important issue! Why should corporations intent primarily on production and profit jeopardize the health of people and our plant and animal species??? Please help inform and protect consumers by changing the current policies. THANK YOU

Sincerely,
Sally Orr
