Re: docket#98P-0151/CP1

I am writing to urge you to end the "downed" animal trade. These animals, so ill in many cases that they are moved/dragged with tractors and chains, comprise such a small percent of the trade that the specious claims that the industry will suffer can be dismissed. In truth, the callous lack of compassion that allows such cruelty for the sake of profit is a shame and scandal in the agricultural industry. Please do the right thing and don't rationalize such inhumane methods to placate special interests and industry lobbyists.

Thank you,

Karen Falk
