**RE: ESSENTIAL AMINO PLUS**

Dear Sir / Madam:

This is a 30-day notification of a statement of nutritional support for a dietary supplement. The product name is **Andrew Lessman's Essential Amino Plus**. The structure / function claims on all sizes and configurations of this product are identical. They are as follows:

It is specifically designed to improve the quality of the protein and amino acid content in your diet by emulating the amino acid composition of critical tissues and organs, such as cardiac and skeletal muscle tissues. Additionally, the quality of protein in our diet is now recognized as essential not only for the maintenance of those vital tissues, but also for the structure and function of every enzyme in your body, which are collectively responsible for all of the metabolic activities you perform. Since a chain is only as strong as its weakest link, the quality, not just the quantity of protein in your diet is decisive in maintaining optimum health and physical performance. This convenient, concentrated source of amino acids offers unparalleled support during periods of intense physical activity, stress or energy demand, especially during the recovery that follows.

Respectfully Submitted,

A handwritten signature in cursive script that reads "Shawn Tiller".
