re. Docket # 98P-0151/CP1

We urge you to follow the lead of your sister agency, the USDA, by supporting the call for a prohibition against the slaughter of "downed animals."

There is no human need for this barbaric practice to continue and no discernible rationale other than what we can only call "brute economics."

Surely this prohibition if put into force will cause little financial hardship to multi-billion dollar agribusiness.

While the FARM SANCTUARY approach is, in our view, not necessarily the perfect solution, life experience has taught us that if one waits for the perfect solution, nothing will be done. The Farm Sanctuary is one whole heck of lot better than the current disgusting situation.

Thank you for your consideration of these comments.

Sincerely,

Judy Holder and Barry Parsons
