RE: CIRCULATION & VEIN SUPPORT

Dear Sir / Madam:

This is a 30-day notification of a statement of nutritional support for a dietary supplement. The product name is **Andrew Lessman's Circulation & Vein Support**. The structure / function claims on sizes and configurations of this product are identical. They are as follows:

Andrew Lessman's CIRCULATION & VEIN SUPPORT FOR HEALTHY LEGSSM is an all natural herbal bioflavonoid blend designed to support the health of the circulatory system, particularly the veins and capillaries of the legs. Because of their location in your lower extremities, the circulatory tissues in the legs are comprised of perhaps the hardest working blood vessels in your entire body. Not only must it deliver nutrient-rich oxygenated blood to your legs, but it must then battle against gravity to transport deoxygenated blood and waste products back to your heart and internal organs for cleansing. It is this difficult journey back to the heart and internal organs that stresses the tissues of the legs. As we age, we become more aware of the uncomfortable burden that gravity can place on circulation in our lower extremities. Factors, such as stress, prolonged standing, or high temperatures can cause fluid to leak from the blood vessels in our legs resulting in swelling and our legs feeling heavy. This unique natural formula is specifically designed to support and maintain the health and tone of the veins and capillaries in your legs and to help reduce the swelling and sensations of heaviness that result from common, everyday conditions.

This formula contains a high potency blend of special bioflavonoids, including Diosmin and Hesperidin, to target circulatory tissues. Bioflavonoids have a long history of providing support for delicate capillaries and Diosmin has been used in Europe for over 30 years, where numerous clinical studies have demonstrated its benefits for the maintenance and support of healthy circulation in the legs. In addition to supporting capillary health and improving venous tone, Diosmin also possesses strong anti-oxidant properties. We also add Vitamin C to our unique balanced blend of bioflavonoids, because of its synergistic relationship with bioflavonoids, as well as its anti-oxidant benefits and properties that support healthy circulation. Just as its name describes, **Circulation & Vein Support for Healthy Legs** is specifically designed to provide the much-needed natural support for maintaining healthy circulation in the veins and capillaries of the legs.

Respectfully Submitted,
